

# SUPRIYA DUTTA

Hello! I am a **Game Designer** and **Programmer** currently working on exploring ways to elicit emotions in players through level, system and narrative design.

## Contact details

supriya.dutta@aalto.fi

## Game projects

1. **Influencer** - Cozy narrative game (in development)  
(link: [soupsfactory.github.io/games/influencer/](https://soupsfactory.github.io/games/influencer/))  
A narrative-driven, cozy game currently in development that uses level design and emotional progression to tell a story of belonging and social rejection.
  - Research to understand how environment and external behavior influence human emotion to inform the core game mechanics and level layouts.
  - Narrative & Level Design: Designed and implemented levels in Unreal Engine that guide players through a sequence of emotions, from warmth and safety to fear and insecurity.
2. **How Should I Look Today?**  
(link: [soupsfactory.github.io/games/gamepoem/](https://soupsfactory.github.io/games/gamepoem/))  
A project that explores the emotional impact of social exclusion through gameplay, inspired by a real-life incident.
  - Level Design: Designed levels within the Godot Engine to evoke feelings of confusion and fear, mirroring the narrative's central themes.
  - Gameplay & Art: Programmed and implemented core gameplay mechanics using Godot and created all pixel art assets using Aseprite, demonstrating proficiency across multiple development disciplines.
3. **Thoughts Out!**  
(link: [soupsfactory.github.io/games/thoughtsout/](https://soupsfactory.github.io/games/thoughtsout/))  
A 3D platform puzzle game set in a dreamlike world, where an annoying dragon alters the environment, making puzzles easier or harder.
  - Puzzle & Platforming Design: Developed and implemented complex 3D platforming maps and puzzles, creating engaging challenges for the player.
  - Player Onboarding: Designed and built a comprehensive First-Time User Experience (FTUE) to seamlessly teach players the game's core mechanics and narrative.
  - UX/UI Collaboration: Conducted usability tests and collaborated with a visual designer to create a smooth, intuitive player experience.

## Language:

English - fluent

## Work experience

- **UX Intern(present), Rovio Entertainment, Espoo**
  - UX Design for developing in-house Game engine to make playable ads
  - UX Design for developing inhouse AI-powered image generation for marketing team
- **Game User Research Assistant, Aalto University Espoo**  
Player research for games, usability testing, user interviews, data analysis, user recruitment
- **Visual Developer, Eli Lily, India**  
UX and UI design, developed data visualizations for therapeutic areas, usability testing
- **UX Designer, MathWorks, India**  
UX and UI Design, A/B testing, user interviews, usability tests, workflow mapping, wireframing

## Education

- **M.Sc, Game Design and Development**  
Aalto University, Finland  
August, 2023 - present
- **M.Design, Interaction Design**  
IDC School of Design,  
Indian Institute of Technology,  
Bombay, India  
2017-2019
- **B.Engineering, Computer Science and Engg**  
Jorhat Engineering College, Assam,  
India  
2013-2017

## Skills

- Game Design, Level Design, Tutorial Design
- UX and UI Design
- Playtesting, Player research

## Tools

- Unity, c#
- Unreal, cpp
- Figma
